

The Pepco Energy Savings for Business program offers incentives to install energy efficient measures. To take advantage of these incentives, you must meet the following eligibility requirements:

1. Be a Pepco customer and business in the Maryland territory.
2. Have an electrical demand less than or equal to 100 kW over the last 12 months with annual kWh of less than 875,000.<sup>1</sup>
3. Have an existing facility, as new construction is not eligible for this program.
4. Not be a temporary account, a cellular phone or microwave transmission tower account, or a vacant facility. These may be eligible for New Construction or other programs.

If a single customer has multiple accounts in the same facility and one account has less than or equal to 100 kW demand over the previous 12 months, the equipment serviced through that account is eligible for Small Business program incentives; equipment serviced by accounts with demand greater than 100 kW are not eligible for Small Business program incentives.

**All projects require pre-approval.**

You can also contact your installation contractor or equipment vendor to discuss energy efficient equipment options. If you do not have a contractor or vendor in mind, please visit our website for a list of Service Providers.

Additional Terms and Conditions apply. Contact our team for more information.

<sup>1</sup>Accounts with annual kWh usage  $\geq 400,000$  but  $< 875,000$  kWh will require further review from the Program, even if the accounts meet the kW program requirements.

In addition, incentives greater than \$30,000 or kWh savings greater than 45,000 for one or a combination of projects, completed within the last three years, will receive additional review and will require explanation from customer and/or Service Provider.

Eligible Measures and Incentives			
Measure	Tank Size (in gallons)	Base Incentive	Requirement
Heat Pump Water Heater	<40	\$862	Meets ENERGY STAR® criteria of EF or COP > 2.0 and FHR > 50 gallons/hr <i>Note: FHR is first hour rating, which is found on the spec sheet, GPM x 60</i>
	40	\$1,955	
	50	\$2,070	
	>50	\$2,128	
Commercial Clothes Washer Tier 1 ( $\geq 2.20$ MEF, $\leq 4.5$ WF) (Electric DHW; Electric Dryer)		\$230	Meets ENERGY STAR® criteria and have a $\geq 2.20$ Modified Energy Factor (MEF) and $\leq 4.5$ Water Factor (WF)
Commercial Clothes Washer Tier 1 ( $\geq 2.20$ MEF, $\leq 4.5$ WF) (Electric DHW; Gas Dryer)		\$230	Meets ENERGY STAR® criteria and have a $\geq 2.20$ Modified Energy Factor (MEF) and $\leq 4.5$ Water Factor (WF)
Commercial Clothes Washer Tier 2 ( $\geq 2.40$ MEF, $\leq 4.0$ WF) (Electric DHW; Electric Dryer)		\$460	Meets ENERGY STAR® criteria and have a $\geq 2.40$ Modified Energy Factor (MEF) and $\leq 4.0$ Water Factor (WF)
Commercial Clothes Washer Tier 2 ( $\geq 2.40$ MEF, $\leq 4.0$ WF) (Electric DHW; Gas Dryer)		\$460	Meets ENERGY STAR® criteria and have a $\geq 2.40$ Modified Energy Factor (MEF) and $\leq 4.0$ Water Factor (WF)
Residential Clothes Washer CEE Tier 2 (Electric DHW; Electric Dryer)		\$85	Meets CEE Tier 2 criteria
Residential Clothes Washer CEE Tier 2 (Electric DHW; Gas Dryer)		\$85	Meets CEE Tier 2 criteria
Residential Clothes Washer CEE Tier 3 (Electric DHW; Electric Dryer)		\$115	Meets CEE Tier 3 criteria
Residential Clothes Washer CEE Tier 3 (Electric DHW; Gas Dryer)		\$115	Meets CEE Tier 3 criteria
Residential Dehumidifier (used in Commercial Setting)		\$35	Meets ENERGY STAR® criteria
