

Saving energy at home is possible

And it's easier than you think

Pepco's **Home Performance with ENERGY STAR**[®] program can help maximize your home's energy efficiency and save money. Request a Home Energy Assessment and discover how to:

Get rebates of up to \$10,000 on eligible energy-saving home upgrades

Take advantage of 0% interest financing in the first 24 months (for qualified applicants)

Reduce your energy use and lower monthly costs

Increase your comfort and improve air quality

Help conserve resources and reduce our carbon footprint

Tax credits available

Air sealing and insulation work is eligible for an Inflation Reduction Act federal tax credit up to 30% of your project costs (up to \$1,200).* Plus, if you upgrade to a new ENERGY STAR certified hybrid water heater, you could receive an additional tax credit up to 30% of your project costs (up to \$2,000).

Get started today

Request your assessment today or find a participating contractor in your area at **[pepco.com/HomePerformance](https://www.pepco.com/HomePerformance)** or **866-353-5798**.

Lower your energy costs in 3 easy steps

1. Schedule an assessment

Start with a Home Energy Assessment for only \$100[†] (a **\$400 value**). A Participating Contractor will evaluate your home's systems and check for moisture, drafts, and mold.

2. Ask about rebates and financing

You'll get a report that details your home's energy use, with recommendations for money-saving improvements. You may earn rebates **up to \$10,000** and even qualify for low-interest loans (starting at 0% for 24 months).[‡]

3. Complete energy-saving improvements

Once the improvements are completed, a final test is done to ensure there are no air quality or safety issues. Your contractor will submit a signed job completion form **within 30 days** to ensure that your rebate check will arrive within six to eight weeks.[§]

[†]The \$100 offer is valid for homes up to 3,000 square feet with a single combustion appliance zone. Assessments of larger homes or ones with multiple combustion appliance zones may cost more. You should discuss the cost with your selected Participating Contractor.

[‡]Rebates are capped at 75% of project cost or up to \$10,000.

[§]We reserve the right to monitor and conduct inspections of the installed measures and equipment listed on the job completion form. We may verify compliance with the Home Performance with ENERGY STAR program guidelines, the accuracy of project documentation, and measures and equipment/system performance.

Ask an Energy Coach

Questions about your Home Energy Assessment? Our trained experts can assist you throughout the rebate process at no cost to you.
