

Energy Efficient Communities Program

ENERGY SAVINGS FOR BUSINESS PROGRAM

The **Energy Efficient Communities program** offers financial incentives, technical expertise, outreach, and educational opportunities to municipal, government, and public-serving customers interested in making energy efficiency upgrades.

Program Benefits

Organizations participating in the Energy Efficient Communities program can enjoy:

- Reduced energy and maintenance costs
- Optimal climate control
- Extended equipment life
- Application assistance
- Higher incentive rates
- One complimentary Operations and Maintenance Training course

Eligibility

- County, municipal, city, or town government agency
- Public school district or publicly funded college or university
- Nonprofit organization, religious institution, or community service organization or facility
- Pepco customer with a commercial electric account

Contact us at **866-353-5798** to get started. Pepco Account Executives make sure you meet the eligibility requirements, complete applications, and find Service Providers. They also provide advice and guide you through the program requirements.

Program Participation

- Identify an Energy Champion—the facility's point of contact—who meets with the designated Account Executive, takes trainings, and assists with program applications
- Develop an implementation plan to identify goals, facilities, measures, and a timeline
- Meet with Pepco quarterly to review program details and goals
- Receive pre-approval of every project
- Send one member of the operation to complete an Operations and Maintenance Training course during the 2024–2026 program cycle
- Complete all project work by Nov. 19, 2027

Incentives

Customers in the Energy Efficient Communities program can receive any incentives offered through Pepco's Energy Savings for Business program. Account Executives work with each establishment every step of the way to identify projects that best meet its needs.

Common Projects

- Interior/exterior lighting and controls
- Chillers
- Commercial appliances and kitchen equipment
- HVAC units
- Variable frequency drives

Other Projects

- Compressed air
- Data center equipment
- Building envelope
- Building control systems
- Building tune-up
- Monitoring-based commissioning
- Combined heat and power

Get started today.

Engineering Services

Our team will review the planned projects to determine the appropriate application type. Applications can be in one of two categories: prescriptive or custom/new construction projects.

Prescriptive Projects

- Review specifications to make sure equipment qualifies and assist with workbooks and completion of online applications
- Provide program criteria and incentive guidance if equipment does not qualify
- Identify potential energy savings to help with project design

Custom/New Construction Projects

- Determine comparison baseline, program-acceptable calculations and preliminary cost effectiveness; review required documentation
- Offer Custom Applications Workshops, held throughout the year

Offer valid for Pepco commercial customers in Maryland only. EmPOWER Maryland programs are funded by a charge on your energy bill. EmPOWER programs can help you reduce your energy consumption and save you money. To learn more about EmPOWER and how you can participate, go to pepco.com/Business.
