

## Pepco Energy Savings for Business Program

### Small Business Program Commercial Refrigeration and Kitchen (in Existing Buildings)

#### Eligible Measures and Incentives

The Pepco Energy Savings for Business Program offers incentives to install energy efficient commercial refrigeration and kitchen measures.

To take advantage of these incentives, you must meet the following eligibility requirements:

1. Be a Pepco customer and business in the Maryland territory with an electrical demand  $\leq$  60 kW over the last twelve months with annual kWh of less than 875,000\*
2. Have an existing facility, as new construction is not eligible for this program.
3. Not be a temporary account, a cellular phone or microwave transmission tower account, or a vacant facility. These may be eligible for New Construction or other programs.

If a single customer has multiple accounts in the same facility and one account has  $\leq$  100 kW demand over the previous twelve months, the equipment serviced through that account is eligible for Small Business Program incentives; equipment serviced by accounts with demand  $>$  100 kW are not eligible for Small Business Program incentives.

\*Accounts with annual kWh usage  $\geq$  400,000 but  $<$  875,000 kWh will require further review from the Program, even if the accounts meet the kW program requirements.

In addition, incentives greater than \$30,000 or kWh savings greater than 45,000 for one or a combination of projects, completed within the last three years, will receive additional review and will require explanation from customer and/or Service Provider.

#### All projects require pre-approval.

You can also contact your installation contractor or equipment vendor to discuss energy efficient equipment options. If you do not have a contractor or vendor in mind, please visit our website for a list of Service Providers.

Additional Terms and Conditions apply; see Application tab for full details.

FOOTNOTES	
1	These measures must replace existing units. New units should be similar in general size and style as the existing unit.

GENERAL PROVISIONS	
1	Existing units must be removed and disposed of properly. Program may, at its sole discretion, require proof of disposal prior to payment of any incentives.
2	Except where explicitly indicated as Residential in the measure name, all new equipment must be Commercial Equipment, as identified by the Energy Star, CEE, or WaterSense listing for the equipment.
3	Pepco may, at its sole discretion, reduce any incentive offer based upon current market pricing of the proposed equipment.
